To Our Valued Patients:

Due to changes in some insurance plans, not all diagnosed procedures and/or treatment modalities are covered benefits of your dental plan. We will diagnose the most appropriate treatment for your dental needs and we will not start any treatment without your consent.

Whether your insurance pays a percentage or denies payment for the procedures submitted, you are responsible for your account balance. We will do our best to obtain information regarding insurance coverage, however that information is only an estimate. Your covered benefits and out of pocket expense may vary (from the estimated patient information we are able to obtain) depending upon the final decision of your insurance company. That written decision is contained in the EOB (explanation of benefits) form your insurance company provides to you after treatment is billed.

If you would like definite information regarding your insurance coverage, we suggest a preauthorization of dental treatment form be submitted to your insurance company prior to you starting any dental treatment. This information takes approximately four to six weeks to receive.

Please read over your insurance coverage information provided to you by your insurance company. If you have additional questions please call your insurance company direct or contact the Human Resources department of the subscriber's employer.
